A30. Capital Adequacy (continued)

- a) The capital adequacy ratios of the Group and of the Bank (continued):

Regulatory capital requirements

The capital adequacy ratios of the Group and of the Bank are computed in accordance with BNM's Capital Adequacy Frameworks on Capital Components and Basel II - Risk-Weighted Assets. The minimum regulatory capital adequacy ratios before including capital conservation buffer ("CCB"), countercyclical capital buffer ("CCyB") and higher loss absorbency ("HLA") requirement for CET I capital ratio, Tier I capital ratio and total capital ratio are 4.5%, 6.0% and 8.0% respectively.

A CCyB is required to be maintained if this buffer is applied by regulators in countries which the Group and the Bank have exposures to, determined based on the weighted average of prevailing CCyB rates applied in those jurisdictions. The Group and the Bank have applied CCyB on their private sector credit exposures outside Malaysia in line with the respective jurisdictions' requirement to maintain their CCyB. The CCyB is not a requirement for exposures in Malaysia yet but may be applied by regulators in the future.

Effective from 31 January 2021, HLA requirement is applicable to financial institutions designated as domestic systemically important banks ("D-SIBs"). Arising from this, the Group which is designated as a D-SIB by BNM is required to maintain an additional capital buffer of 0.5% to the regulatory capital requirements in line with the BNM's D-SIB Framework.

Prudential buffers and transitional arrangements

Prior to the COVID-19 pandemic, banking institutions are required to maintain a CCB of 2.5%. However, effective from 25 March 2020, banking institutions are allowed to drawdown the CCB of 2.5% to manage the impact of the COVID-19 pandemic but are required to rebuild this buffer after 31 December 2020 as well as to meet the minimum regulatory requirements by 30 September 2021. As at the reporting date, the Group and the Bank continued to maintain a CCB of 2.5%.

As allowed under the BNM's Capital Adequacy Frameworks on Capital Components, financial institutions which elect to apply the transitional arrangements for regulatory capital treatment of accounting provisions are allowed to add back a portion of the Stage 1 and Stage 2 provisions for expected credit losses to CET I capital over a four-year period from financial year beginning 2020, or a three-year period from financial year beginning 2021. As at the reporting date, the Group and the Bank have not applied the said transitional arrangements.
