Adoption of MFRS 119 Employee Benefits

The adoption of the revised MFRS 119 effective 1 January 2013 affected the accounting treatment on the recognition of certain gains and losses arising from defined benefit plans.

The key impacts are:

- Actuarial gains and losses are recognised immediately in other comprehensive income, as compared to recognition in the income statement over a period of time previously
- Changes in the basis of computation of net interest income on the net assets of the defined benefit plan which is recognised in the income statement
- Retrospective application of MFRS 119 which resulted in the restatement of comparative financial statements
